## A SPECIAL MESSAGE FROM STEVE RENEAU:

“To all my family and friends, my mother was fighting the good fight with diabetes for quite some time now... she would always complain about her aches and pains ,she would often call me when I was visiting her... to give her a massage when she's in pain...my Mother was self-employed cleaning homes to provide for us... when I was younger she took me a few times to work with her... only then I realized how much sacrifice my mother made to provide for us and to try give us a good life. In the summertime her greatest pleasure was taking us to the beach... she would often invite her friends to come along to the beach... those memories she gave us will be with us forever... Her greatest joy was when the whole family was together visiting her especially on Sunday when she would cook her stew chicken and rice and beans and potato salad... my mother really enjoy cooking... whenever my family our friends was visiting she would always make had something to eat ... my mother was very loving to us and she had that equal love for all her kids... but when was time for us to get discipline she was very strict with that... sometimes discipline would include getting a good whipping with the belt. And that's because she really loved and wanted us to do the right thing... Please accept our heartfelt thanks for your kind wishes and prayers at this very sad time for our family, especially my father who is now going to be home without my mother... but I'm sure the good Lord is going to give him the strength to get past this...

Anyone who would like to send flowers there is a link to the florist on the funeral home website... once again thank you all...I truly appreciate you all.... from me and my family... know that we all can live a healthy lifestyle.

“ *The love of my grandmother "mommy" will always be embedded deep in my heart. We had a special bond that can never be replaced. I will cherish all the life lessons, the special talks, the food, the hugs, her energy and laugh. My grandmother was a phenomena*
